Lava Tester

Quickly debug your lava for emails, workflows, and more.

CENTRAL
CHRISTIAN CHURCH

Lava Tester by Central Christian Church (AZ)

Package Description

The Rock Lava Tester block will save you hours of time by letting you *quickly test* your *Lava* against your real-world **Person**, **Group** or **Workflow** data. The tool passes each of entities you select to your Lava and then renders it using the standard Rock Lava engine.

This block has literally saved our team countless hours testing the Lava that we're working out in our new email templates and workflow actions.

Attended Check-in by NewSpring Church

Free

Install

★★★★★

Last Updated
1/19/2017

Required Rock Version

Package Description

Attended Check-in empowers your staff or volunteers to provide a welcoming, fast, and personal check-in experience. It adds several features not found in Rock check-in, such as intelligent assignments, room balancing, and new family entry.

Attended Check-in uses the same Check-in Areas, Locations, Schedules, Devices, and Labels as the check-in system that ships with Rock, so you can download Attended Check-in and try both systems simultaneously. If you haven't already read the Checking Out Check-in manual, you'll definitely want to start there.

Package Website

An innovative, cloud-based solution designed to increase generosity across your ministry.

Pushpay Integration by Pushpay

Package Description

Pushpay is complete giving solution that engages your community and makes admins happy. Churches see dramatic increases when people use our 10-second giving app. Our complete solution – including web, kiosk and text – naturally moves the user toward the mobile experience. Now with the Pushpay Rock plugin those gifts move right into your Church Management System with ease.

PCO Sync by Mine Cart Studio

$399

Buy

☆☆☆☆☆

Last Updated
5/30/2017

Required Rock Version

Package Description

Planning Center Online (PCO) is a service that helps to manage teams of volunteer and especially the scheduling of those volunteers for specific weekend services. These volunteers are usually the same people that you have in Rock. So why should you have to re-enter all their information in PCO when you already have it in Rock? And what do you do when your volunteers update their information in PCO, but forget to let you know? The PCO Sync solves these problems for you. It will automatically add, update, and archive users in PCO based on the group(s) in Rock that they belong to. And if a volunteer updates their information in PCO, that updated information will automatically be synced back to Rock (and vice-versa). This allows both systems to have the most up-to-date information about your volunteers as possible.

SecureGive
Rock RMS Integration

SECUREGIVE®
Giving Made Simple

SecureGive Integration by SecureGive

Package Description

What is SecureGive?

Proudly serving one-third of America's Top 100 churches, SecureGive's focus is to provide churches and NPOs with donation tools that produce real results. By leveraging SecureGive, your organization will be equipped to connect and collect from all demographics. Whether this be through kiosk, online, mobile or within a text-giving format, there will be no more barriers.

Interested in using SecureGive?

SecureGive was founded by a pastor to help churches and non-profit organizations fund their mission. The SecureGive donation software features 4 ways for your donors to give/interact: kiosk, online, mobile, and text giving. Visit our website or call one of our Stewardship Specialist

Check-in Tools by Central Christian Church (AZ)

Package Description

The Check-in Tools plugin provides several blocks that assist with configuring and troubleshooting check-in for your organization. Several of the blocks included in this package were presented at RX2016.

Associated Devices

This block goes on the Location Detail page and enables the user to manage which devices are associated with a location. It provides a list of devices tied to the location shown, and when you enter edit mode it allows you to add or remove additional devices. It's a great time saver when you're adding a new location and need to quickly connect a bunch of kiosks to it.

A **Bricks and Mortar Studio** Project

Upgrade your check-in

Check-In Extensions by Bricks and Mortar Studio

Package Description

Keep track of some groups' attendance offline? No problem. Rapidly add large volumes of paper based atttendance to Rock with our unique block designed with scale and speed in mind.

Add custom badges to your user's profiles that track their attendance to specific groups and use custom report blocks to identify who's attended recently, attenders incorrectly marked inactive, and which groups users have attended.

Want to keep a headcount as well as a person-by-person record of attendance? Record the heacount for each of your groups and compare them with the recorded attendance of your users.

SendGrid®

Deliver email with confidence

SendGrid Email Transport by Bricks and Mortar Studio

Package Description

SendGrid is one of the most reputable and reliable email delivery services on the web, trusted by companies such as Airbnb, Foursquare, Spotify, Kickstarter, and Tumblr.

This plugin takes advantage of SendGrid for delivering emails and also utilises their tracking functionality to report events like emails being opened, links being clicked, and failed deliveries to help you analyse the reach and effectiveness of your communications.

Text To Workflow

Text-To-Workflow by Mine Cart Studio

Package Description

This plugin allows you to launch workflows from incoming SMS text messages and supply a response. The response is up to your workflow to determine so the sky is the limit. Please read the manual for full details on how to configure the plugin but at a high-level here's what's possible.

Configuration

Once the install is complete you will notice a new Defined Type called 'Text To Workflow'. This is where you'll configure your Twilio number. From here you'll also map the keywords to the workflow type to launch. So for instance if the guest types 'SP' to the phone number (602) 555-5521 it will launch a new workflow of the type 'Register for Starting Point'.

Person History Follower by Shepherd Church

Package Description

This Rock Following Type implements a new Following Event Type that uses the information recorded in Person History to detect changes to a person's properties or attributes. This will allow you to detect and flag changes on a person's Membership Status, Marital Status, First Name, Last Name, and many others.

As with other Following Event Types you may configure as many specific Events that your users can subscribe to. When a specific Event is detected they will receive an e-mail informing them about that event occurring.

You can read more about Following Events and how to configure them in the Person & Family Field Guide

PDF Toolkit by Mine Cart Studio

$400

Buy

☆☆☆☆☆

Last Updated
7/14/2017

Package Description

Who doesn't love PDF, right? Native web pages are great, but at the end of the day sometimes you need PDF for those items that need to be downloaded and saved. Unfortunately, creating dynamic PDFs on the fly has been tricky, until now. Due to the fact that quality HTML -> PDF components are not open-source this functionality is provided as a plugin.

In fact, this plugin doesn't give you one tool to create PDFs, it provides you three, that's right... three.

1. Lava To PDF Block – Place this block on a page and you can create PDFs from a simple Lava Template.
2. PDF Merge Document – Rock Core supports both Word and HTML merge docs, now you can add PDF to that list!

Last Updated
6/7/2017

If you're a SQL-inclined person and you've ever searched in vain for the link between two tables, this plugin might help bridge the gap! It lists all of the defined links between tables so you know how to JOIN one table to another.

Please note that the list of links isn't 100% complete because some tables need to be looked up by multiple values. Check out the documentation and screenshot on GitHub.

Once the plugin is loaded, you'll see a new "SQL Map" page under "Power Tools" - go there and jumping from one SQL table is as easy as clicking the link.

(This plugin is based on a previous STB post, and was created in order to make it that much easier for the community to have the information they need

EmailTo Workflow

Email To Workflow by Mine Cart Studio

Package Description

The Email To Workflow plugin allows you to build advanced workflows that interact using email. While workflows have always been able to send email, with this new plugin, they can also be started from a workflow as well as be updated from a workflow.

In the first use case, an incoming email can be setup to start a new workflow. This passes on information like the sender, subject and message body. Your workflow will take this information and process based on your organization's need.

The second use case is a bit different. You can also configure a new email to update an existing workflow. When the 'Enable Active Workflow Match' feature is enabled, the plugin will look for a Workflow Id in the subject line (prefixed with a # sign). If one is found, the plugin will call the activity named 'Incoming Message' (the name must be an exact match or a new workflow will

Cloudinary Storage Provider by Mine Cart Studio

Package Description

So you may be thinking to yourself, "Another storage provider... why do I need another one?" Well, Cloudinary is no ordinary storage provider. Sure it can hold all your files in the 'cloud' just like Amazon S3 and the Azure File Storage provider. But what makes Cloudinary special is what it can do to transform your files as you load them. Enticed... well read on!

Cloudinary really shines with images. Once you upload an image to Cloudinary it can be retrieved with hundreds of different filters and transforms. For instance, it can:

- Resize your image
- Apply color filters

Birthday Announcements by Mine Cart Studio

Package Description

Who doesn't like their birthday acknowledged? Ok... there's crazy Aunt Mary, but she doesn't count. With the birthday announcement job you can easily keep tabs on birthdays as they happen.

This Rock Job will send out birthday announcements to a group of individuals. The numerous configuration options allow you use it in several different ways. The most powerful configuration setting is the use of a Data View to drive the list of people you are interested in knowing their birthday for. This allows you to be VERY creative with your criteria. Some criteria to consider includes:

- Age (youth, seniors)
- Marital Status (singles ministries)
